ABOUT ME

I am always looking for opportunities to better myself and develop my skills. I have learnt a lot through my previous work experience and look forward to learning even more. I pride myself on being punctual, sincere, a team player and someone who other people love working with. I like to be fun to work with as well as someone who can be depended on to get the work done on time and to the best quality. **I'm available to start as soon as possible.**

SKILLS

JavaScript	Communication
TypeScript	Listening
React	Initiative

Available on request from Dev Academy and Farmer Autovillage

EXPERIENCE

Full Stack Web Developer (Student)
Jan 2024 - Apr 2024
Dev Academy | Remote

This was a 17-week program that provided great knowledge and skills to help me get started in the Software Development Industry, with 800 hours of learning. I spent time working with HTML5, CSS, JavaScript, TypeScript, Node.js, React, External-APIs, Tailwind, Superagent, Express, Databases, Front-End Testing, Back-End Testing and Auth0.
They also helped with developing my Soft Skills such as inclusion, empathy, compassion and much more! A lot of the time was spent working in pairs or in groups so I had a lot of opportunity to develop my skills working in a team and using agile methodologies to maximize production.

Customer Initialisation Specialist
Sep 2023 - Nov 2023
Red Energy Australia | Melbourne | Hybrid

I moved overseas to explore opportunities in Australia. I worked at Red Energy as a Customer Initialisation Specialist, that included working in a call center onboarding customers and gaining their consent for Red Energy to charge them for their energy consumption. This role taught me a lot of people skills and strengthened my ability to relate to customers while connecting with them. Unfortunately, due to a family emergency, I had to move back to NZ after a few months.

Parts Advisor
Jun 2022 - Jul 2023
Farmer Autovillage | Tauranga

I worked full-time as a car groomer, which included washing cars and paying close attention to detail to deliver the best results. I left for a 3-month OE in 2022 and returned to the same company. I came back as a parts advisor which included dispatching orders, stock taking, picking and packing, organisation and general attention to detail.

Traffic Controller
Jan 2020 - Apr 2022
Downer (first Adecco contracted to Downer) | Auckland

I worked full-time in Auckland as a traffic controller. A big focus of this role was enforcing health and safety as well as communication with team members and awareness on the roads, I worked with Adecco in Auckland before being taken on full-time by Downer and gaining my Class 2 driver's license.
